SUMMARY

MERN stack developer in training at Programming Hero (B-14 batch). I build responsive, real-data web apps with Next.js and React, add authentication and protected routes, and deploy every project live.

SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), React, Next.js, Tailwind CSS

Auth and APIs: BetterAuth (email/password, Google, GitHub), REST API integration

Learning: Node.js, Express, MongoDB

Tools: Git, GitHub, Vercel, Netlify, Figma, VS Code

PROJECTS

Bazar Dor **Next.js 16, React, Tailwind CSS, BetterAuth**

Live demo | Source code

- Market price tracker for everyday grocery items with category pages and sorting.
- Email/password, Google and GitHub sign-in with BetterAuth; protected product detail pages.
- Skeleton loaders, custom 404 page, profile update and toast notifications.

FitLog **Next.js App Router, Tailwind CSS, Figma**

- Gym workout library app built from a Figma design on the Next.js App Router.

DevConf 2026 **HTML5, CSS3, GitHub Pages**

- Landing page for a fictional developer conference, built with only HTML5 and CSS3 from a Figma design.
- Sticky navbar, hero with dark overlay, CSS Grid speaker section and pricing cards.

Lumière **HTML5, CSS3, JavaScript, Netlify**

- Skincare brand website built on my own before the course, deployed on Netlify.

EDUCATION

Full Stack Web Development Course (B-14 batch), Programming Hero 2026 - Present
